

Make Premixing Easy and Fast

**compact • light weight
water line in • premix out**

PENERGETIC PREMIXER

Ideal for mixing penergetic k and penergetic p ULTRA (powder) quickly and evenly.

[Can also be used to premix other dry powders.]

PENERGETIC PREMIXER works in combo with a chem handler (by sending mixed powder to the handler) or can be used as a stand alone unit – sending mixed product to the sprayer tank.

Free standing unit with metal bracket and base
Easy rinse out / clean up after use
Tank calibration in US Gallons

DIFFERENT MODELS AVAILABLE

- Tank Sizes: 30 USG (115 l.) or 60 USG (130 l.)
- Fitting/hose sizes: 2" or 3"
- Available with or without pump/motor
- * Inquire about optional accessories

Operation:

Combination of recirculation pump, cone-shaped tank, PVC plumbing fittings, valves and camlocks ensures ease of use. Batch mix dry powder in less time than it takes to fill the sprayer tank. Save time with no product wasted.

1. Turn valve for water - fill to desired level.
2. Turn valves to premix - add product.
3. When mixed turn valves to pump to chem handler tank.
4. Repeat for more batches.
5. Turn valve for water to rinse.

If there is head pressure on incoming water, valves can be turned on to fill premix tank without starting premix pump. If no head pressure water can be pumped in by premix pump. Has bypass valve for pump unloading.

Uses camlock couplers for quick assembly + disassembly for hook up / cleaning / shipping / storage + repairs.
