

Manure Treatment with Proven Results

"Due to heavy sludge, I hadn't been able to pump out the manure pit in my dairy barn for almost 20 years. Yet, within 90 days of applying the Penegetic technology (Penegetic g - slurry activator) I was able to pump it out completely!

I now have a well functioning in-barn manure pit and the wear and tear to my pumping equipment has decreased significantly."

S. Johannsen – Monroe, WA
